## HEALTH HAZARD INFORMATION

---

### Health Effects:

#### Acute

**Swallowed:** The liquid is irritating to the gastro-intestinal tract and may be harmful if swallowed. Ingestion may result in nausea, abdominal irritation, pain and vomiting. Considered an unlikely route of entry in commercial/industrial environments.

**Eye:** The liquid is irritating to the eyes and is capable of causing temporary discomfort with mild redness of the conjunctiva (similar to wind-burn), temporary impairment of vision or other transient eye damage/ulceration.

**Skin:** The liquid is irritating to the skin if exposure is prolonged and is capable of causing skin reactions which may lead to dermatitis from repeated exposures over long periods. Toxic effects may result from skin absorption.

**Inhaled:** Not normally a hazard due to non-volatile nature of product.

**Chronic** Principal route of exposure is usually by skin contact. As with any chemical product, contact with unprotected bare skin; inhalation of vapour, mist or dust in work place atmosphere; or ingestion in any form, should be avoided by observing good occupational work practice.

### First Aid

**Advice** For advise, contact a Poisons Information Centre (Phone eg. Australia 13 11 26; New Zealand 03 4747 000 [Not after May 2005] or 0800 764 766 or a doctor at once).

**Swallowed** If swallowed, do NOT induce vomiting.

**Eyes** If in eyes, hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes.

**Skin** If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water.

## Safety Points

Avoid contact with eyes.  
Avoid contact with skin.  
Wash hands after use.

## Advice to Doctor:

Treat symptomatically

---

## PRECAUTIONS FOR USE

---

<b>Exposure Standards:</b>	None assigned for mixture
<b>Engineering Controls:</b>	General exhaust is adequate under normal operating conditions. If risk of overexposure exists, wear SAA approved respirator. Correct fit is essential to obtain adequate protection. Provide adequate ventilation in warehouse or closed storage areas.
<b>Personal Protection:</b>	Eye - Safety glasses with side shields; or as required, Chemical goggles. Contact lenses pose a special hazard; soft lenses may absorb irritants and all lenses concentrate them.  Hands/Feet - r protective gloves, eg. PVC  Other - Overalls. Barrier Cream. Eyewash unit
<b>Flammability:</b>	None flammable

---

## SAFE HANDLING INFORMATION

---

### Storage and Transport:

Suitable Container - Polyethylene or polypropylene container. Plastic carboy. Plastic drum. Polyliner drum.  
Packing as recommended by manufacturer. Check all containers are clearly labelled and free from leaks.  
Storage Incompatibility - Avoid storage with acids.  
Storage Requirement - Store in original containers. Keep containers securely sealed. Store in a cool, dry, well ventilated area. DO NOT allow to freeze. Store away from incompatible materials. Protect containers against physical damage and check regularly for leaks. Observe manufacturer's storing and handling recommendation.  
Transportation - No restrictions.

### Spills and Disposal:

Minor Spills - Slippery when spilt.  
Clean up all spills immediately.  
Avoid breathing vapours and contact with skin and eyes.  
Control personal contact by using protective equipment.  
Contain and absorb spill with sand, earth, inert material or vermiculite.  
Wipe up. Place in suitable labelled container for waste disposal.  
Major Spills - Slippery when spilt.  
Minor Hazard. Clear area of personnel.  
Alert Fire Brigade and tell them location and nature of hazard.  
Control personal contact by using protective equipment as required.  
Prevent spillage from entering drains or water ways.  
Contain spill with sand, earth or vermiculite.  
Collect recoverable product into labelled containers for recycling.  
Absorb remaining product with sand, earth or vermiculite and place in appropriate containers for disposal.

Wash area and prevent runoff into drains or waterways.  
If contamination of drains or waterways occurs, advise emergency services.  
Disposal - Recycle wherever possible or consult manufacturer for recycling options.  
Consult State Land Waste Management Authority for disposal.  
Treat and neutralise with dilute acid at an effluent treatment plant.  
Recycle containers, otherwise dispose of in an authorised landfill.

**Fire/Explosion Hazard:**

Non combustible.  
Not considered to be a significant fire risk.  
Heating may cause expansion on decomposition leading to violent rupture of containers.  
Decomposes on heating and may produce toxic fumes of carbon monoxide (CO).  
May emit acrid smoke.  
Other decomposition products include carbon dioxide (CO<sub>2</sub>).
