

## Advice to Doctor:

Treat symptomatically.

---

## PRECAUTIONS FOR USE

---

<b>Exposure Standards:</b>	No exposure limits proposed by National Health and Medical Research Council. TLV is the time weighted average concentration of the work atmosphere over a normal 8-hour work day and a 40-hour work week. Nearly all workers may be repeatedly exposed to this level, day after day, without adverse effect. These TLVs are issued as guidelines for good practice. All atmospheric contamination should be kept to as low a level as is practically possible. These TLVs should not be used as fine lines between safe and dangerous concentrations.
<b>Engineering Controls:</b>	No special ventilation required.
<b>Personal Protection:</b>	Avoid contact with eyes. Use gloves if prone to dermatitis.
<b>Flammability:</b>	Non combustible. Non flammable.

---

## SAFE HANDLING INFORMATION

---

<b>Storage and Transport:</b>	Keep containers securely sealed and protected against physical damage. Ensure containers are clearly labelled. During hot weather vent drums at regular intervals.
<b>Spills and Disposal:</b>	Isolate leaking containers and stop leak if safe to do so. Slippery when spilt. Avoid accidents, clean up immediately. In the event of a small spill: Use absorbent (soil or sand, sawdust, inert material, vermiculite). Collect and seal in properly labelled drums for disposal. In event of large spill: Contain - prevent contamination of drains and waterways. Pump out to a waste/recovery tank.
<b>Fire/Explosion Hazard:</b>	No unusual fire or explosion hazards. Non combustible. In case of fire in the surroundings use the appropriate extinguishing method for the area. No reactivity data available. No Hazchem Code allocated.
